HOBIES

- Painting
- Theatre
- Chess

ABOUT

As a dedicated Junior DevOps Engineer, I bring a robust foundation in cloud technologies, **automation**, and software development. With an **AWS Certified Cloud Practitioner** certificate and extensive knowledge of **Linux** systems, I am well-equipped to handle diverse operational challenges. My proficiency in **Python**, **C#**, and **JavaScript**, along with hands-on experience using **Docker** and **Kubernetes**, allows me to streamline workflows and enhance system reliability. Passionate about DevOps methodologies and continuous improvement, I am eager to contribute to innovative projects and grow within a dynamic tech environment.

EXPERIENCE

SOFTWARE QA TESTER

Insider - İstanbul -

- Contributed to the **web automation project** Atlas, enhancing testing efficiency and accuracy.
- Conducted both manual and automated testing of software products to ensure quality and functionality.
- Worked extensively in an **Agile environment**, collaborating closely with development teams to meet **sprint** goals and improve **product delivery cycles**.
- Utilized testing frameworks and tools to develop, execute, and maintain test scripts.
- Identified, documented, and tracked software defects, providing detailed reports to aid in resolution.
- Played a key role in regression testing and **continuous integration** processes to ensure seamless software updates and deployments.
